A fleet of three ships is travelling down the entire Danube River. They include scientists from all Danube countries. Looking into the Danube to uncover what lies beneath the surface, they are testing the water for pollution and waste and seeing what kinds of organisms depend on the river for their lives – from tiny plankton to fish.

We all want clean water for drinking and swimming, and as a home for the plants and animals that we love and care for. We are watching your Danube. You can too.

Get involved! Online (www.icpdr.org/JDS) you can view the JDS2 and some of its results, stories and pictures. Or just come to the river and see it live!
